Office Action Summary

Application No.

09/730,338

Applicant(s)

MURSTEIN ET AL.

Examiner

Michael P Nghiem

Art Unit

2863

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 December 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11, 13-30 and 32-38 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-4, 6, 7, 9-11, 13-21, 26-30, 32, 33, 35, 36 and 38 is/are rejected.
- 7) ☒ Claim(s) 5, 8, 22-25, 34 and 37 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

The Amendment filed on December 22, 2003 has been acknowledged.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6, 7, 9-11, 13-21, 26-30, 32, 33, 35, 36, and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by Koenig (US 5,923,874).

Koenig discloses all the claimed features of the invention including:

- a performance system and method of monitoring performance (Fig. 1) for a plurality of members (20's) configured as an entity (Fig. 1), comprising:
 - a performance monitor system (10) for each of the plurality of members, the performance monitoring system monitoring member specific metrics (performance data stored in 40, 60, 70, 80);

- a first computer (20a) having a gathering and aggregation system (including 55, 90, 120) adapted to gather performance metric data from the plurality of members and aggregate the performance metric data into a unified result set (90, Fig. 1);

- the first computer being configurable to receive a configuration setting defining the operational metric information to be logged, the first computer replicating the configuration setting to the plurality of members (Abstract, lines 4-11);

- each of the plurality of members have a gathering and aggregation system (55) such that the unified result set can be gathered and aggregated from any of the plurality of members (column 7, lines 29-34);

- the performance monitor system for each of the plurality of members employing a time aggregation component adapted to aggregate member specific metrics over time (column 7, lines 20-34);

- the time aggregation component being further operable to aggregate member specific performance metrics data into data, of larger time periods and larger resolutions (column 7, lines 29-33);

- the performance gathering, and aggregation system further comprising a performance entity aggregation component (55) adapted to gather and aggregate performance metric data values of a particular time period and resolution (column 7, lines 2-34) from the plurality of members based on a time period and time resolution requested by a requestor (170);

- the performance entity aggregation component being operable to aggregate data performance values having similar data times (sample time can be specified,

column 7, line 29) to form a unified result set over the particular time period and time resolution;

- the plurality of members logging member specific operational metrics to a data store (40, 60, 70, 80) corresponding to that particular member;

- the gathering and aggregation system being further adapted to receive a request from a requestor (170) for operational metric information for the entity and return the unified result set back to the requestor (Fig. 4);

- the requestor being one of an external process, an internal process, an external consumer, a user interface and another entity (Fig. 4);

- any of the plurality of members are configurable to receive a configuration setting defining the operational metric information to be logged (Abstract, line 8);

- the performance gathering and aggregation system being operable to aggregate valid operational metric data and compensate for invalid operational metric data (via 55);

- the gathering and aggregation system being further adapted to provide a unified result set of operational metric data for a single member (via 70, 80);

- a configuration consumer (170) component operable to determine settings in the member specific configuration settings and log performance metric information based on the settings (column 8, lines 1-67);

- the configuration consumer component being notified of changes in the member specific configuration settings and being operable to access these changes through a configuration store (answer area 600, address space 150);

- the configuration consumer component being operable to access a configuration store to create a global list containing performance metrics to be logged to a data store (90) (data records are global since they can be accessed by different modules, Fig. 1);

- monitoring and storing performance metrics at a plurality of members (1230);
- querying at least one operational metric from the plurality of members (1270);
- aggregating the at least one performance metric from the plurality of members to form a unified result set (1250);
- receiving a request from a requestor (1120, 1220) for a performance metric for the entity prior to the step of querying and returning the unified result step (Figs. 11, 12);
- aggregating the performance metric over time at each of the plurality of members after the step of monitoring and prior to the step of querying (1250 is after 1230 and before 1270, Fig. 12).

Allowable Subject Matter

2. Claims 5, 8, 22-25, 34, and 37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Reasons For Allowance

3. The combination or method as claimed wherein a performance monitoring system comprising the time aggregation component aggregating member specific performance metrics data into data of larger time periods and larger resolutions by taking one of an average, a minimum, a maximum, a last and a weighted average of performance metrics data of a first time period and first resolution to evaluate performance metric data of a consecutive time period and consecutive resolution (claims 5, 8) or a metric consumer component communicatively coupled to the configuration consumer component wherein the metric consumer component accesses the global list and retrieves performance metric data from a metric source based on the performance metrics in the global list and logs the performance metric data to the data store (claim 22) or dynamically updating the logging of performance metric data at each of the plurality of members based on any changes in the performance metric settings (claims 34, 37) is not disclosed, suggested, or made obvious by the prior art of record.

Response to Arguments

4. Applicant's arguments filed on December 22, 2003 have been fully considered but they are not persuasive.

With respect to the 35 USC 102 rejections, Applicants argue that Koenig fails to disclose replicating or propagating the configuration setting to the plurality of members.

The Examiner incorrectly asserts that the abstract (lines 4-11) discloses these limitations.

Examiner's position is that the abstract of Koenig (lines 4-13) discloses that "the first computer (first data server, Abstract, line 4) being configurable to receive a configuration setting (first data server receives reportable data, Abstract, lines 9-11) defining the operational metric information to be logged (use and load data to be reported, Abstract, lines 11-13), the first computer replicating the configuration setting to the plurality of members (first data server passes data to the reporter facility, Abstract, line 11, which comprises of one or more data sets, Abstract, lines 2-4)".

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

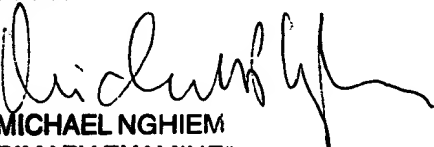

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Contact Information

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Nghiem whose telephone number is (571) 272-2272. The examiner can normally be reached on M-H from 6:30AM – 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Barlow can be reached at (571) 272-2269. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
